

Websites

Make your website worthy of your business.

A complete business website, from the page plan to the live site.

Service overview

fortitudo.agency

When the business has moved on, but the website has not.

Launch a new business, reposition an established one, or replace a site you have outgrown.

An unclear story

Visitors have to piece together what you do and whether it is right for them.

A disconnected journey

The site looks finished, but enquiries, bookings or publishing still need manual work.

A site nobody can own

Every small update becomes another request to a developer.

One website. From first impression to next step.

Page structure and copy built around your business

Responsive design and development across the agreed pages

Enquiries, bookings, CMS and required integrations

Launch checks, deployment and an editable handover

Why work with us.

A clearer first impression

We organize your pages and copy around the questions customers need answered.

Design and delivery together

The visual identity, build and connected journeys are reviewed as one experience.

A site your team can manage

The agreed CMS, access and documentation are part of the handover.

From the first conversation to a clear handover.

01 Review the business, content and existing site.

02 Agree the pages, design direction and connected workflows.

03 Build and review the real content at desktop and mobile sizes.

04 Test, launch and hand over access and documentation.

A working result, checked together.

We agree what success looks like before delivery, then review the work against it.

The agreed pages work at desktop and mobile sizes.

Forms, booking and connected workflows reach the right destination.

Your team has the access and guidance to manage the site.

Explain the business. Make it recognizable.

Structure and copy

Page planning, navigation, service and product explanations, relevant calls to action and copy grounded in your business. We map the questions a visitor needs answered before they contact you.

Brand and interface

A responsive design system with deliberate typography, imagery and page layouts. We can implement your existing identity or scope a new brand kit alongside the website.

Build the journey. Prepare the launch.

Pages and publishing

Marketing pages, About, Product, Solutions, Resources, Blog, Contact and supplied legal content. Content management and publishing workflows are selected around your team's needs.

Connected customer journeys

Enquiries, booking systems, CRM connections, email capture and third-party APIs where required. Each integration has a defined purpose and a tested success and failure path.

Launch and handover

Domain connection, technical SEO foundations, responsive checks, accessibility review, performance work and deployment. Your team receives the agreed files, accounts and documentation.

Start at the right scale.

New website or complete rebuild

Design and development for an agreed page inventory and customer journey.

Repair an existing website

A scoped Unslop engagement when the foundation is worth keeping.

A clear scope before the work begins.

What we need from you

Your current URL, brand assets, page requirements, approved business facts, system access and a decision-maker for feedback.

What shapes the scope

Pages and content · Integrations and CMS ·
Migration and launch requirements

Scope and responsibilities

Page count, content production, CMS, integrations and migration are defined in the proposal. Hosting, paid fonts, stock licenses and ongoing maintenance are identified separately.

Your written proposal confirms price, timing, responsibilities, review points and final inclusions.

Before you decide.

Can you work with our existing brand?

Yes. We can build within your existing identity or include a brand refresh in the proposal.

Can you fix our current site instead?

Yes. We inspect the foundation first. If a focused repair makes sense, the Unslop offer covers design, content and functional improvements without assuming a full rebuild.

Let's talk about your website.

Send your current site or page requirements. We will map the build and quote the complete scope.
