

# Unslop

Bring a rough website or AI-generated content up to the standard of your business.

---

## Unslop Repair

You have a starting point, but the design, copy, brand consistency or customer journey falls short.

A review of what works and what needs to change

A representative correction that establishes the direction

The agreed design, writing and development repairs

A checked, usable result with the revised files or site

Scope. Delivery. Ownership.

Read the offer. Share it with your team. Start a conversation.

# Unstop Repair

## The result

Revised work that reflects your business, with the agreed functional checks and a clear account of what changed.

01 A review of what works and what needs to change

02 A representative correction that establishes the direction

03 The agreed design, writing and development repairs

04 A checked, usable result with the revised files or site

## Where we start

Send the site or content. We will inspect it and recommend a focused repair or explain when a rebuild is the better choice.

# What we can build.

## Inspect before replacing

We review the actual pages, copy, code and customer journeys. The first decision is what to preserve, what to repair and whether any part needs a rebuild.

## Website repair

Information structure, typography, spacing, visual hierarchy, brand consistency, mobile layouts, forms and connected journeys. The work is scoped around observable defects and the intended experience.

## Content repair

Rewrite generic or repetitive website and business copy for a defined audience. Improve structure, terminology and specificity while preserving your facts, conditions and voice.

# The details that make it work.

## Claims and factual questions

Identify statements that need evidence, qualification or removal. We do not invent customer stories, authority signals or results to make the work more persuasive.

## Representative correction

Establish the direction on a meaningful part of the work before applying it more widely. Inspect the result in its actual context, then complete the remaining agreed scope.

# Choose the work you need.

A focused engagement or a complete build. Each option is scoped and quoted for your business.

## Unslop your website

A scoped design, content and functional repair of an inspected website.

## Unslop your content

Editorial repair of an agreed set of pages or documents, with factual questions retained.

Your proposal brings the selected work into one scope, with review milestones, responsibilities and a project price.

# A clear path to handover.

## 01

Inspect the existing work and record what needs attention.

## 02

Agree a repair scope and a representative correction.

## 03

Complete the design, writing and development changes.

## 04

Recheck affected journeys and hand over the revised work.

## How we review the result

The agreed design and editorial issues are resolved in context.

Claims and business facts are preserved or flagged for your review.

Affected pages and customer journeys are rechecked after the changes.

# Know what you are agreeing to.

## What we need from you

The current site or documents, source access where relevant, brand references, approved business facts and one reviewer who can resolve factual questions.

## Scope and dependencies

New branding, major backend replacement, original research and additional integrations are separate scopes. We do not promise AI-detector scores, search rankings or revenue outcomes.

## Your proposal

Deliverables, milestones, review rounds, responsibilities, price and timeline are set out before work starts. Third-party costs and changes to scope are identified separately.

## After handover

Optional care and improvement retainers have an agreed scope and support terms. Ongoing support is a separate choice; ownership does not depend on buying a retainer.

## Discuss a repair.
