

Websites

A complete business website, from the page plan to the live site.

Website Launch

Launch a new business, reposition an established one, or replace a site you have outgrown.

Page structure and copy built around your business

Responsive design and development across the agreed pages

Enquiries, bookings, CMS and required integrations

Launch checks, deployment and an editable handover

Scope. Delivery. Ownership.

Read the offer. Share it with your team. Start a conversation.

fortitudo.agency/services/websites

Website Launch

The result

A complete website, tested across the agreed pages and customer journeys, with the access and documentation your team needs to manage it.

01 Page structure and copy built around your business

02 Responsive design and development across the agreed pages

03 Enquiries, bookings, CMS and required integrations

04 Launch checks, deployment and an editable handover

Where we start

Send your current site or page requirements. We will map the build and quote the complete scope.

What we can build.

Structure and copy

Page planning, navigation, service and product explanations, relevant calls to action and copy grounded in your business. We map the questions a visitor needs answered before they contact you.

Brand and interface

A responsive design system with deliberate typography, imagery and page layouts. We can implement your existing identity or scope a new brand kit alongside the website.

Pages and publishing

Marketing pages, About, Product, Solutions, Resources, Blog, Contact and supplied legal content. Content management and publishing workflows are selected around your team's needs.

The details that make it work.

Connected customer journeys

Enquiries, booking systems, CRM connections, email capture and third-party APIs where required. Each integration has a defined purpose and a tested success and failure path.

Launch and handover

Domain connection, technical SEO foundations, responsive checks, accessibility review, performance work and deployment. Your team receives the agreed files, accounts and documentation.

Choose the work you need.

A focused engagement or a complete build. Each option is scoped and quoted for your business.

New website or complete rebuild

Design and development for an agreed page inventory and customer journey.

Repair an existing website

A scoped Unslop engagement when the foundation is worth keeping.

Your proposal brings the selected work into one scope, with review milestones, responsibilities and a project price.

A clear path to handover.

01

Review the business, content and existing site.

02

Agree the pages, design direction and connected workflows.

03

Build and review the real content at desktop and mobile sizes.

04

Test, launch and hand over access and documentation.

How we review the result

The agreed pages work at desktop and mobile sizes.

Forms, booking and connected workflows reach the right destination.

Your team has the access and guidance to manage the site.

Know what you are agreeing to.

What we need from you

Your current URL, brand assets, page requirements, approved business facts, system access and a decision-maker for feedback.

Scope and dependencies

Page count, content production, CMS, integrations and migration are defined in the proposal. Hosting, paid fonts, stock licenses and ongoing maintenance are identified separately.

Your proposal

Deliverables, milestones, review rounds, responsibilities, price and timeline are set out before work starts. Third-party costs and changes to scope are identified separately.

After handover

Optional care and improvement retainers have an agreed scope and support terms. Ongoing support is a separate choice; ownership does not depend on buying a retainer.

Discuss your website.
